

# Advanced Training For Practitioners

With Michele Mayama

With almost 30 years experience helping others to open and shift the causal level within consciousness, Michele has honed a level of mastery she is now sharing with others. This body of work is uniquely expansive and applicable across a broad spectrum of healing modalities. Non-practitioners on a conscious healing journey are also welcome and will find the material and processes helpful to their personal growth.

**From Michele:** I have created a series where I can facilitate deeper, more practical and experiential courses for those working in the energetic/intuitive fields of healing. Instead of one long course like the Chakra Course, I have split up the areas of focus into modules, each one consisting of two classes. The first class (day 1) of each module will focus on the principles and beginning to learn the methods. The second class (day 2) focuses on reporting the experiences of working with clients, specific support for individual soul designs, and deepening the practice. Some of the topics were touched upon in the Chakra series, but not opened in depth. Prerequisite: The Chakra Series or comparable background.

Each module is scheduled for a full weekend, both Saturday & Sunday, from 10am-5pm each day. Classes are scheduled about twice per year. Watch our calendar (or join our email list) for notification. For participants who complete one or more modules, I will host periodic practitioner forums to share experiences, receive feedback and coaching, further the practices, and explore more facets of what emerges as we support people evolving through this large-scale shift of consciousness and energetic restructuring.
